ABOUT SWADHEENTA'20

#HackSwadheen

The DA-IICT Center for Entrepreneurship and Incubation presents **Swadheenta'20**, an initiative unparalleled so far, a combination of the **national level Hackathon Hack Infinity 2.0, a first-time ever in India, Business Indradhanush, MLH Local Host Workshop, Elastic User Group meet up** and loads of fun activities, all under one roof.

Top notch industry professionals will be present to mentor you, judge your hacks, and if you are worthy, they will offer you a chance for interviews for internships/placements.

Today, the world needs, not pieces of code, but solutions, and Swadheenta aims to provide that in 48 hours!!

ABOUT HACK INFINITY 2.0

**A developer is one who takes
caffeine and outputs code!**

One of India's largest student hackathons, Hack Infinity 2.0 presents pocket-watering prizes, an undeniable thrill and a huge knowledge base.

Hack Infinity 2.0 gains its inspiration from Hack Infinity 2017, which was a grand success. A software only hackathon, Hack Infinity 2.0 brings together developers to compete for 48 hrs on some of the most industry relevant topics of today like FinTech, Blockchain, Climate and Data, so you can code almost anything, any way you want!

ABOUT INDRADHANUSH

We take you from a dream, to product!

Indradhanush, is a Business Hackathon for the first time in Gujarat, in association with Startup India, under the banner of our mega event Swadheenta'20.

A 2-day event, where participants will have a chance to get mentored by an exhaustive panel of judges in the topics of Business model formation, pitching investors, marketing and to pitch in front of some of India's most prolific Venture Capitalists & Entrepreneurship experts. Groups formed will continue post the event, and will continue till you have a startup ready!

ABOUT TECHNICAL WORKSHOPS

We aim to take you from a zero, to pro!

MLH LocalHost Workshop, will take complete tech newbies, on a journey of an Introduction to Blockchain, creating a Blockchain application using Score. The 3 hour workshop will give you a brief overview about Blockchain and its applications, at the end of which, will get kicked off some great projects under purview of some of the coolest mentors of the industry, over two months, ending with a project presentation at MLH Share Day.

The **Elastic Meetup**, for Elastic Users to come together and discuss on the latest trends in the Elastic stack, as well as help new developers get started with the Elastic Stack, is also a must attend.
